

## LIST OF PUBLICATIONS OF MARIAPIA SACCOMANI

### *Papers in referenced international journals*

- A1. Cobelli, C., Saccomani M.P., Ferrannini E., DeFronzo R.A., Gelfand R., R.C. Bonadonna. A compartmental model to quantitate in vivo glucose transport in the human forearm. Am. J. Physiol., 257(6):E943-E958, 1989.
- A2. Cobelli, C., M.P. Saccomani. Unappreciation of a priori identifiability in software packages causes ambiguities in numerical estimates. Letter to the Editor. Am. J. Physiol., 258(6):6 21 6, 1990.
- A3. Cobelli, C., M.P. Saccomani. Domain of validity of classical models of leucine metabolism assessed by compartmental modeling. Math. Biosci., 107:3-20, 1991. DOI:10.1016/0025-5564(91)90069-U
- A4. Cobelli, C., M.P. Saccomani. Accessible pool and system parameters: assumptions and models. J. Parent. and Ent. Nutr., 15(3):45S-50S, 1991. doi: 10.1177/014860719101500345S.
- A5. Cobelli, C., Saccomani M.P., Tessari P., Biolo G., Luzi L., D.E. Matthews. Compartmental model of leucine kinetics in humans. Am. J. Physiol., 261(4):E539-E550, 1991.
- A6. Saccomani M.P., C. Cobelli. Qualitative Experiment Design in Physiological System Identification. IEEE Control Systems, 12(6):18-23, 1992. DOI: 10.1109/37.168813
- A7. Bonadonna, R.C., Saccomani M.P., Seely L., Zych K., Ferrannini E., Cobelli C., R.A. DeFronzo. Glucose transport in human skeletal muscle: the in vivo response to insulin. Diabetes, 42(1):191-198, 1993. DOI:10.2337/diabetes.42.1.191
- A8. Bonadonna, R., Saccomani M.P., Cobelli C., R.A. DeFronzo. Effect of insulin on system A amino acid transport in human skeletal muscle. J. Clin. Invest., 91(2):514-521, 1993. DOI:10.1172/JCI116230
- A9. Bonadonna, R., Del Prato S., Saccomani M.P., Bonora E., Gulli G., Ferrannini E., Bier D., Cobelli C., R.A. DeFronzo. Transmembrane glucose transport in skeletal muscle of patients with non-insulin-dependent diabetes. J. Clin. Invest., 92(1):486-494, 1993. DOI:10.1172/JCI116592
- A10. Bonadonna, R.C., Saccomani M.P., C. Cobelli. In vivo glucose transport in human skeletal muscle: tools, problems and perspectives. Bailliere's Clinical End. and Met. E. Ferrannini, Ed., Bailliere Tindall, London, UK, 7(4):929-960, 1993. DOI: 10.1016/S0950-351X(05)80240-X
- A11. Saccomani, M.P., C. Cobelli. A minimal input-output configuration for a priori identifiability of a compartmental model of leucine metabolism. IEEE

Transactions on Biomedical Engineering, 40(8):797-803, 1993.  
DOI:10.1109/10.238464

- A12. Saccomani, M.P., Bonadonna R.C., Cavegion E., DeFronzo R.A., C. Cobelli. Bicarbonate kinetics in humans: identification and validation of a three-compartment model. Am. J. Physiol., 269(1):E183-E192, 1995.
- A13. Saccomani, M.P., R.C. Bonadonna, D.M. Bier, R.A. DeFronzo, C. Cobelli. A model to measure insulin effects on glucose transport and phosphorylation in muscle: a three-tracer study. Am. J. Physiol., 270(1):E170-E185, 1996.
- A14. Bonadonna, R.C., Del Prato S., Bonora E., Saccomani M.P., Gulli G., Natali A., Frascerra S., Pecori N., Ferrannini E., Bier D.M., Cobelli C., R.A. DeFronzo. Role of glucose transport and glucose phosphorylation in muscle insulin resistance of NIDDM. Diabetes, 45(7): 915-925, 1996. DOI:10.2337/diabetes.45.7.915
- A15. Lowe, N.M., Shames D.M., Woodhouse L.R., Matel J.S., Roehl R., Saccomani M.P., Toffolo G.M., Cobelli C., J.C. King. A compartmental model of zinc metabolism in healthy women using oral and intravenous stable isotope tracers. Am. J. Clin. Nutr., 65(6):1810-1819, 1997.
- A16. Audoly, S., D'Angiò L., Saccomani, M.P., C. Cobelli. Global identifiability of linear compartmental models. A computer algebra algorithm. IEEE Transactions on Biomedical Engineering, 45(1):36-47, 1998. DOI:10.1109/10.650350
- A17. Bonadonna, R.C., Saccomani M.P., Del Prato S., Bonora E., DeFronzo R.A., C. Cobelli. Role of tissue-specific blood flow and tissue recruitment in insulin-mediated glucose uptake of human skeletal muscle. Circulation, 98(3):234-241, 1998. DOI:10.1161/01.CIR.98.3.234
- A18. Audoly, S., Bellu G., D'Angiò L., Saccomani M.P., C. Cobelli. Global identifiability of nonlinear models of biological systems. IEEE Transactions on Biomedical Engineering, 48(1):55-65, 2001. DOI:10.1109/10.900248
- A19. Saccomani, M.P., Audoly S., D'Angiò L. Parameter identifiability of nonlinear systems: the role of initial conditions. Automatica, 39(4):619-632, 2003. DOI:10.1016/S0005-1098(02)00302-3
- A20. Saccomani, M.P. Some results on parameter identification of nonlinear systems. Cardiovascular Engineering: An International Journal, 4(1):95-102, 2004. DOI: 10.1023/B:CARE.0000025127.86536.9f
- A21. Juillet, B., Saccomani, M.P., Bos, C., Gaudichon, C., Tomé, D., H. Fouillet. Conceptual, methodological and computational issues concerning the compartmental modeling of a complex biological system: postprandial inter-organ metabolism of dietary nitrogen in humans. Math. Biosci., 204: 282-309, 2006. DOI:10.1016/j.mbs.2006.05.002

- A22. Pillonetto, G., Saccomani, M.P. Input estimation in nonlinear dynamical systems using differential algebra techniques. Automatica, 42(12):2117-2129, 2006. DOI:10.1016/j.automatica.2006.07.014
- A23. Bellu, G, Saccomani, M.P., Audoly, S., D'Angiò, L. DAISY: a new software tool to test global identifiability of biological and physiological systems. Computer Methods and Programs in Biomedicine, 88(1):52-61, 2007. DOI:10.1016/j.cmpb.2007.07.002
- A24. Saccomani, M.P., Audoly, S., Bellu, G., D'Angiò, L. Examples of testing global identifiability of biological and biomedical models with the DAISY software. Computers in Biology and Medicine, vol.40(4):402-407, 2010. DOI:10.1016/j.compbimed.2010.02.004
- A25. Roper, R.T., Saccomani, M.P., P. Vicini. Cellular signaling identifiability analysis: a case study. Journal of Theoretical Biology, 264(2):528-537, 2010. DOI:10.1016/j.jtbi.2010.02.029
- A26. Saccomani, M.P. An effective automatic procedure for testing parameter identifiability of HIV/AIDS models. Bulletin of Mathematical Biology, 73(8):1734-53, 2011. DOI: 10.1007/s11538-010-9588-2
- A27. Saccomani, M.P., S. Audoly. Two examples of testing global identifiability with the Daisy software tool. Simulation News Europe, 20(2):25-28, 2012. ISSN 0929-2268
- A28. Kirk, J.A., M.P. Saccomani, S.G. Shroff. *A Priori* Identifiability Analysis of Cardiovascular Models. Cardiovascular Engineering and Technology, 4(4):500-512, 2013. DOI: 10.1007/s13239-013-0157-3
- A29. Raue, A., Karlsson, J., Saccomani, M.P., Jirstrand, M., J. Timmer. Comparison of Approaches for Parameter Identifiability Analysis of Biological Systems. Bioinformatics 30(10), 1440-1448, 2014; DOI: 10.1093/bioinformatics/btu006
- A30. Saccomani, M.P., K. Thomaseth. The Union between Structural and Practical Identifiability Makes Strength in Reducing Oncological Model Complexity: A Case Study. Complexity, Hindawi, Volume 2018, Article ID 2380650, 10 pages, <https://doi.org/10.1155/2018/2380650>
- A31. Saccomani, M.P., K. Thomaseth. Calculating all multiple parameter solutions of ODE models to avoid biological misinterpretations. Mathematical Biosciences and Engineering, 16(6): 6438-6453, 2019. Doi: [10.3934/mbe.2019322](https://doi.org/10.3934/mbe.2019322)

*Papers in international books*
